This sums it up quite nicely.

Please release humanity from the stifling monarchy that Microsoft has created. "Freedom to Innovate"? Not quite, Bill; "Freedom to desecrate" is closer to the truth, but still not quite there.

The effect Microsoft has had on the computer industry is disgusting. Bill Gates and his money have systematically destroyed everything the industry stood for, and all of the individuals on whose shoulders it stands. Bush sold millions of peoples' ideals right down the river on this one, and something needs to be done. Please be strong enough to stand up to Microsoft, finally ending their blatant laughter in the face of human liberties everywhere. Too dramatic, you say? Think again. Take a look at what this company has truly done TO humanity, and ask yourself if that statement is untrue.

Sincerely,

Damon Miller

(An individual trying to breathe under Microsoft's despotic tyranny)
